PERSONAL INFORMATION

I was born on the 21th of June, 1994. My passion for technology already started at a young age. For instance, I disassembled and reassembled computers for fun when I was 10 years old. This is why I chose to follow an IT administrator course at age 16. During this course, I learned that this is not quite the job that I want to do for the rest of my life because I had the feeling that the work proceedings would not contain the challenge im searching for, I still finished the course.
I also learned that I like to build websites. This is why I chose to follow my current course, "Mediatechnology". I feel comfortable in my current education.

In 5 years I see myself as a well experienced developer, working for a company that can offer me a lot of knowledge.
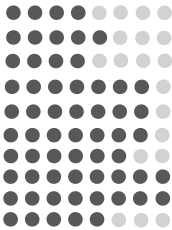

MY SPECIALITIES

Backend development
(PHP)

Frontend development
(HTML5, css, Javascript & Jquery)

Database manipulation
(mySQL)

SKILLS

Software & languages
